

Journal of Advances in Information Technology

CONTENTS

Volume 15, Number 8, 2024

- Knowledge Distillation Generative Adversarial Network for Image-to-Image Translation896
*Chayanon Sub-r-pa and Rung-Ching Chen**
- Improving Tomato Disease Classification Using BR-TomatoCNN: An Efficient Model Utilizing Bottleneck Residuals.....903
U. Shruthi, V. Nagaveni, and Sunil G. L.*
- Hybrid SVM-Bidirectional Long Short-Term Memory Model for Fine-Grained Software Requirement Classification914
Mahmuda Akter Metu, Nazneen Akhter, Sanjeda Nasrin, Tasnim Anzum, Afrina Khatun, and Rashed Mazumder*
- An Intelligent Android System for Automatic Sign Language Recognition and Learning.....923
Soha A. Shaban and Dalia L. Elsheweikh*
- A Deep Auto Imputation Integrated Bayes Optimized Transfer Learning Model with Hybrid Skill-Levy Search Algorithm (DAI-BOTS) for Call Drop Prediction in Mobile Networks941
G. V. Ashok and P. Vasanthi Kumari*
- Bankruptcy Prediction of Greek Small and Medium-Sized Enterprises Using Imbalance Data.....956
*Vassiliki Papadouli, Elias Houstis, and Manolis Vavalis**
- Real-Time Passenger Counting in Streetcars Using High Sound Frequency Signals965
Myoungbeom Chung
- Enhancing Software Quality Assurance in First Unicorn Coffee Shop in Indonesia: A Test Maturity Analysis971
Margreth H Saragih and Astari Retnowardhani*
- A Hybrid Feature Selection Framework Using Opposition-Based Harmony Search and Manta Ray Foraging Optimization.....982
Thatikonda Somashekar and Srinivas Jagirdar*
- Multiscale Superpixel HGCM Combining CNN for Semi-Supervised Hyperspectral Image Classification991
*Jiayue Lu and Sei-ichiro Kamata**
